

Product Designer with 4+ years of experience in complex systems, platforms, and AI, passionate about solving complex workflows through prototyping in code and building with AI.

Experience

Product Designer II @ Shopping Discovery, Wayfair

Aug 2026 - Present

Working across Browse, Navigation, PDP, and Ask Wayfair+, helping shape how customers discover products across Wayfair’s web and iOS mobile experiences.

Product Designer II @ Content Platform, Wayfair

Aug 2023 - Aug 2026

Lead designer for Wayfair’s core content platform, driving product direction across internal tools, AI workflows, and scalable systems that power customer-facing experiences across **250K+ components** and **200M+ monthly traffic** on Wayfair.com and 4 global brands.

Owned the end-to-end redesign of a complex internal content platform used by 50+ teams, driving design direction with Product and Engineering to restructure workspace architecture, capabilities, and navigation; increased user satisfaction by **8.6% within 2 months**.

Reimagined and led Blocky, Wayfair’s internal AI agent, transforming its chat-first experience into guided AI workflows that automate complex content tasks; **built a prototype in code** using Cursor and Claude to shape product direction and align Product and Engineering.

Drove a 0→1 template system from concept to launch, partnering with Marketing, Commercial, Product, and Engineering to define the experience and workflow; reduced page creation time by **83%**, from ~1 hour to 10 minutes, and reached **11.5% adoption** within the first month.

Accelerated product iteration and roadmap delivery **using AI tools including Cursor, Claude Code, and Figma Make**, prototyping product visions, contributing **lightweight production-ready UI code**, and reducing engineering lift across design and implementation.

UX Design Intern @ Owens Corning

Aug - Nov 2022

Streamlined the mobile web quote experience, reducing homeowner wait time from 2 weeks to 3 minutes and supporting faster decision-making for high-intent users.

Product Design Intern @ Wayfair

June - Aug 2022

Prototyped personalized product detail page concepts for 30M+ customers, exploring ways to improve content relevance and inform future product vision.

Others

UX Designer @ Google Maps (Graduate Capstone)

Jan - Jun 2024

Defined a 0→1 personalized discovery concept for Google Maps iOS, translating Gen Z research from interviews, surveys, contextual inquiries, and concept validation tests into feature direction and interactive prototypes that secured stakeholder buy-in.

Figma Plugin - EasySpotlight

Built a plugin using **Cursor AI** to improve design communication workflows, enabling clearer presentation of key ideas and more efficient cross-functional collaboration.

Education

University of Washington

M.S. in Human-Centered Design & Engineering

University of California, Berkeley

B.A. in Cognitive Science

Skills

HTML/CSS, Python, SQL, Cursor, Claude Code, Claude Design, Figma Make, Interaction Design, Visual Design, Prototyping, User Research, Usability Testing, User Interviews, Figma, Adobe Creative Cloud
